Replacement Chart

New to the S-Series

- More model sizes are available allowing for "in-between" selections which save upfront costs. New sizes include the SDB/STXB 33, 36, 42, & 48.
- More high pressure options are available allowing for more selections in the high pressure range.
- The units are more efficient, which allows for selections that use lower horsepower motors for the same selection point.
- The more economic units are well prepared for upcoming energy efficiency regulations.
