MODEL OVERVIEW
Model LPD direct drive fans are designed to exhaust air in low CFM, up to 420, high static pressure applications to 1-3/4". When aesthetics are a concern the low profile design of the LPD is the perfect choice. The LPD is generally used for bathroom, office, or light commercial ventilation in ducted systems; and can be mounted either on the roof or wall as the application requires.

CONSTRUCTION FEATURES AND OPTIONS

MODEL FEATURES
- Exhaust air up to 420 CFM in high static pressure applications up to 1-3/4" w.g.
- Low profile attractive spun aluminum exterior
- Direct drive units have low sound levels and quiet operation
- Non-overloading backward inclined wheel for efficiency at higher static pressures
- Roof or sidewall mounting options
- AMCA Air and Sound Licensed
- cULus 705 Listed

Industry best 5 year fan housing warranty, 3 year motor warranty

All specifications are subject to change without notice unless approved in submittal by S&P USA.
CONSTRUCTION/SPECIFICATION CHECKLIST

Housing
• Ultra low profile, aluminum construction
• Curb cap has integral deep spun inlet for efficient performance and prepunched mounting holes for ease of installation.
• Spun aluminum hood and skirt for weather protection and attractive appearance.
• Up to 140°F airstream temperature.
• Heavy-gauge motor support for rigidity and strength.
• Quick access to motor compartment for ease of maintenance.
• Conduit passage for easy electrical connection from below roof.
• Birdscreen included on standard all models

Wheel
• Backward inclined for efficiency at higher static pressure.
• Non-overloading for safe operation in ducted systems.
• Tapered blades for efficiency and quiet operation.
• Wheels constructed of noncorrosive aluminum.
• Statically and dynamically balanced for smooth operation.

Speed Controllable Motors
• Unique external rotor design.
• Permanently lubricated bearings.
• Internal thermal protection.
• Standard motors are single speed, speed controllable, totally enclosed.
• All motors are rated for continuous duty.
• Disconnect is standard.
• 115V, 230V and 60/50 motor options.

Certifications
• AMCA Air and Sound Licensed.
• cULus 705 Listed Power Roof Ventilator label assures electrical reliability.
• UL label must be specified when needed.

All specifications are subject to change without notice unless approved in submittal by S&P USA.
OPTIONS/ACCESSORIES

Solid State Speed Control: S&P’s solid state control is matched to allow smooth RPM variation and adjustment of airflow for system balancing. CFM is reduced in direct proportion to motor speed reduction. Speed controllers available for 115/1 or 230/1 operation. Exhauster performance can be controlled from the ventilated area.

Roof Curb: Prefabricated heavy-gauge galvanized steel, welded construction, 12" high (other heights are also available) with 1-1/2" wood nailer. Assures perfect fit of exhauster to roof opening. Options include burglar bars, single or double pitch construction and hinged curbs for easy duct access.

Motor Operated Damper: Motor operated aluminum damper for positive closure against backdraft.

Automatic Damper: Automatic aluminum damper for ease in installation and effective backdraft protection.

Curb Hinge Arrangement: The curb hinge arrangement provides easy access to the exhaust fan, backdraft damper, and duct for servicing and cleaning.

Special Coatings: Powered roof exhausters often require special coatings for protective and decorative purposes. Available coatings include: Synthetic Resin, Epoxy, and Heresite (air-dried phenolic). Contact your representative or the factory for more information on available coatings and colors.

Performance certified is for installation type A-free inlet, free outlet. Performance ratings include the effects of birdscreen in the airstream. The sound ratings shown are loudness values in fan sones @ 5’ (1.5m) in a hemispherical free field calculated per AMCA Standard 301. Values shown are for: Installation Type A: free inlet hemispherical sone levels. Speed (RPM) shown is nominal. Performance is based on actual speed of test.

S&P patented motorized impellers typically exceed manufacturer’s RPM ratings as shown in the AMCA certified performance table above. Motor manufacturer’s published ratings are:

- **LPD06A60**: 115/1/60/TE, 2600 RPM
- **LPD08A60**: 115/1/60/TE, 3050 RPM
- **LPD06C60**: 230/1/60/TE, 2600 RPM
- **LPD08C60**: 230/1/60/TE, 3050 RPM
- **LPD06C50**: 230/1/50/TE, 2500 RPM
- **LPD08C50**: 230/1/50/TE, 2700 RPM

S&P USA Ventilation Systems, LLC., Div. of Soler & Palau Ventilation Group, certifies that the Models LPD shown herein are licensed to bear the AMCA Seal. The ratings shown are based on test and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.
