

# THE FAN FLYER

AUGUST 2022

## WELCOME, BUDDY DOLL!

S&P USA is excited to introduce our new President, Buddy Doll! Buddy has worked within the North American and Global HVAC industries for over 35 years. He has held several key roles within important HVAC companies including but not limited to Nortek Air Solutions and Johnson Controls Inc.

During his time at both Nortek and Johnson Controls, Buddy led transformational improvements to the commercial and factory operations of these companies. We are confident that he will be able to share and transfer these experiences at S&P USA.

## NEW PRODUCT ALERT!

With a growing demand for smaller and more flexible units, S&P USA has added the Total Recovery Low Profile with EC motor (TRLPe) to our TR series. Designed to fit tight spaces, the TRLPe 110 is the perfect Energy Recovery Ventilator (ERVs) for light commercial buildings, multi-family homes, and residences with low ceilings. Learn more on our [website](#).
