

THE FAN FLYER

OCTOBER 29, 2020

S&P USA

ADVANCING VENTILATION

IN STOCK NOW

- S&P USA's latest enhancement to our line of Hooded Propeller Roof Exhaust Fans. The HREB-P uses a glass reinforced polypropylene propeller to create a more efficient and cost effective option for exhaust applications.
- Taking efficiency a step further. Model SMXD is a direct drive mixed flow fan specially designed to maximize the airflow performance, making it more efficient and quieter than comparable tubular centrifugal fans.

THE LATEST

- S&P USA is honored to receive an award in the leadership category given by the First Coast Manufacturers Association. Learn more [here](#).
- **How are we doing?** Let us know with this [one minute survey](#).

A MESSAGE FROM OUR PRESIDENT

Being easy to do business with is not just a buzz phrase to us at S&P USA. Our new and improved [website](#), our [Product Application Guides](#), our insightful [Case Studies](#), enhancements to [Optisizer](#), our commitment to excellence in training, and our ability to hold our lead times in check, ALL work together to make us the easiest ventilation manufacturer to do business with.

Effective January 2, 2021, S&P USA will be implementing a 2% price increase on all residential and commercial products. Price list and book will be released as soon as available. All quotes created prior to January 2, 2021 will be good for 60 days. Please see the announcement [here](#).
