

ADVANCING VENTILATION®

TOTAL RECOVERY LOW PROFILE

TRLPe110 & TRLPe110H

ENERGY RECOVERY VENTILATORS

With a growing demand for smaller and more flexible units, we have added the Total Recovery Low Profile with EC motor (TRLPe) to our Total Recovery (TR) series. Designed to fit tight spaces, the TRLPe110 & TRLPe110H are the perfect Energy Recovery Ventilators (ERVs) for light commercial buildings, multi-family homes, and residences with low ceilings.

FEATURES:

- Variable speed
- More efficient EC motor
- MERV 13 filters are available
- Can be mounted in any orientation
- Cross-core differential pressure ports
- TRLPe110 uses line cord power supply
- TRLPe110H is hard wired, no cord
- Suitable for residential and light commercial applications
- Speed controllable high-speed boost mode
- Dial-A-Flow balance and airflow adjustment
- Low voltage percentage timer and point of use controls

What is ECOWATT®?

S&P's Ecowatt® products are our most energy-efficient models. They use Electronically Commutated (EC) or Direct Current (DC) motors. Ecowatt® Accessories are motor control devices and systems that reduce energy consumption.
